Mazda's automotive plans for the early sixties consisted of growing alongside the Japanese economy. To achieve this goal, they began by building an extremely affordable kei car, the R360 in 1960, planning on introducing gradually larger and pricier cars as the Japanese customers became able to afford them. As a preview, testing the waters, a larger "Mazda 700" prototype was shown at

This saved money and gave base engines a stronger block; so starting in 1989 the engines had stronger main bearing supports and caps, thick cylinder walls, balance shafts (on the 2.5 and late turbo 2.2), and cross drilling between the cylinders. Without a lengthened deck, the 2.5 liter engine maintained its displacement with a shortened piston.
