Chapter 14 The Digestive System

Children have a special fascination with the workings of the digestive system: They relish crunching a potato chip, delight in making "mustaches" with milk, and giggle when their stomach "growls."

Download Free Chapter 14 The Digestive System And Body Metabolism Figure 2

No digestion takes place in the esophagus. Next comes the stomach, which is the third part of the digestive system. In the stomach, digestive acids, such as hydrochloric acid, help further break down food and kill accidentally ingested bacteria. Some of these acids come from the liver and the pancreas.

The digestive system ingests and digests food, absorbs released nutrients, and excretes food components that are indigestible. The six activities involved in this process are ingestion, motility, mechanical digestion, chemical digestion, absorption, and defecation. These processes are regulated by neural and hormonal mechanisms.
