GRAVITATION

For this question, use the law of universal gravitation: We are given the value of each mass, the distance (radius), and the gravitational constant. Using these values, we can solve for the force of gravity. This force will apply to both objects in question.

Read Online Conceptual Physics Answers Universal Gravitation Guide

The law of universal gravitation is equal to . We can set these equations equal to one another and isolate by dividing both sides by , the mass of an object on Earth. Using the mass of the Earth, the radius of the Earth, and the gravitational constant, , we get a value of approximately if we solve for .
