Extractable Nuclear Antigen Antibodies Panel Blood Test

Laboratory testing plays a role in the detection of opioid misuse and the evaluation of patients with opioid intoxication. Laboratories use both immunoassay and chromatographic methods (e.g., liquid chromatography with mass spectrometry detection), often in combination, to yield high detection sensitivity and drug specificity.

Laboratory Testing for Prescription Opioids - PMC

5.2.1 Studies (not reports) as the unit of interest. In a systematic review, studies rather than reports of studies are the principal unit of interest. Since a study may have been reported in several sources, a comprehensive search for studies for the review may identify many reports from a potentially relevant study (Mayo-Wilson et al 2017a, Mayo-Wilson et al 2018).

Chapter 5: Collecting data | Cochrane Training

Clandestine chemistry is chemistry carried out in secret, and particularly in illegal drug laboratories.Larger labs are usually run by gangs or organized crime intending to produce for distribution on the black market.Smaller labs can be run by individual chemists working clandestinely in order to synthesize smaller amounts of controlled substances or simply out of a hobbyist interest in ...
