A load data manual is a great source of reloading data – Hornady Handbook of Reloading shown – Image copyright 2013 Ultimate Reloader Getting Started: Understand Your Cartridge and Gun The first thing you'll want to do when you go to find load data is to understand the cartridge you'll be loading for and the gun or guns that you'll be ...

### Finding, Validating, and Managing Load Data - Ultimate Reloader - Reloading Explained

Reloading ammunition for the Mosin Nagant and other 7.62x54R-chambered rifles is an interesting prospect. While simple in the extreme — provided you can find appropriate components — and certainly a great way to get enhanced accuracy out of your rifle, many shooters consider it the pinnacle of foolishness due to the plethora of inexpensive surplus ammunition on the market.

### How to Reload 7.62x54R for Mosin Nagants - Shooting Times

Titegroup is a great propellant that will serve you well and be economical at the same time. There are no special warnings from Hodgdon concerning Titegroup; it's no different than any other popular fast-burning pistol powder such as Bullseye, 700-X, etc. Use it without any consternation, following proper reloading techniques.

### TITEGROUP AND 125GR 38 SPECIAL LOAD DATA

I started by reading up on reloading data. First steps were to open the Hornady load data manual, and the Speer reloading manual to check what would be suggested for 40 S&W at various bullet weights. I confirmed that I'd be using regular small pistol primers, and decided to use Winchester Small Pistol since they seem to work great with a ...

### Getting Ready to Load 40 S&W - Ultimate Reloader

So got my 700 pistol action and a few cut down barrels I'm trying out. I have printed and compared pistol and rifle data from hodgdon site and front and back of Hornady manual. I'm not chasing crazy numbers just trying to find accurate loads. Are there better powders for short barrels aka less...

Yesterday I made the switch from H-335 to Hodgdon CFE 223 powder. My general purpose load of H-335 with the 55 Gr. Hornady FMJBT has been 25.7 Gr. of H-335. I'm seeing that CFE 223 is a tad slower burning. I'm just wondering what you guys are running for charge weight on this powder with the 55 Gr. bullets? According to my new Hornady 9th Edition Reloading Manual, it is showing a max charge of ...

These days far slower powders exist, but the 6.5-300 is still somewhat “touchy” (the word used by Hodgdon's Ron Reiber when he sent me the newly developed 6.5-300 loading data). By coincidence, the only available 6.5-300 Mark V rifle that Weatherby had on hand for this project was an Ultra Lightweight with a slim, fluted barrel.

### 6.5-300 Weatherby Mag Load Data - RifleShooter

by Dave Workman | Senior Editor A 165-grain .30-caliber Nosler AccuBond bullet with its distinctive white polymer tip propelled by 42 grains of IMR 4895 and a CCI primer leaves the muzzle at more than 2,500 fps and it crosses 200 yards in a nano-second. I know because that's the combination that took down my [...]
