Adding JavaScript directly to a HTML file. The first way to add JavaScript to HTML is a direct one. You can do so by using the <script></script> tag that should encompass all the JS code you write. JS code can be added: between the <head> tags; between the <body> tags; Depending on where you add the code the JavaScript in your HTML file, the loading will differ. The recommended practice is to add it in the <head> section so that it stays separated from the actual content of your HTML file.
