The Next Generation Science Standards (NGSS) are K-12 science content standards. Standards set the expectations for what students should know and be able to do. The NGSS were developed by states to improve science education for all students. A goal for developing the NGSS was to create a set of research-based, up-to-date K-12 science standards.

1. Introduction. Soil quality is one of the three components of environmental quality, besides water and air quality (Andrews et al., 2002).Water and air quality are defined mainly by their degree of pollution that impacts directly on human and animal consumption and health, or on natural ecosystems (Carter et al., 1997, Davidson, 2000).In contrast, soil quality is not limited to the degree of ...
