The IP address 192.168.0.1 is one of 17.9 million private addresses, and it's used as the default router IP address for certain routers, including some models from Cisco, D-Link, LevelOne, Linksys, and many others.

192.168.0.1 Default Router IP Address and Routers Using It

192.168.2.1 IP Address and Routers Using It. Private IP addresses, such as 192.168.2.1, were defined by the Internet Assigned Numbers Authority (IANA), a nonprofit private American corporation that oversees global IP address allocation, to delay IPv4 address exhaustion. The exhaustion of IPv4 addresses has been anticipated since the late 1980s and is the main reason why the IPv4 addresses will ...

"I've had the good fortune of working with TVC Capital twice as a CEO. During my first experience working with TVC Capital, they represented our first and only institutional capital and, over the course of five years, they proved essential in helping us execute on our business plan and ultimately exit the company successfully with a sale to Polycom in 2011.
