I have an old SMW System 50 and RT-3J Indexer set up. We just got this set up and running after it's been sitting for the last decade or more. Everything works just fine, my issue is going to be program capacity of the System 50 Controller. I have the manual and it does not mention being able to send the controller commands via RS-232, but was told by an SMW tech that this may be possible.

SMW System-50 Digital Indexer Control Panel Controller AS ...

Is there anyone out there that has knowledge on getting a SMW System 30 indexer programmed to rotate while the machine axis is moving? The SMW manual says it will do it using OP Code 6 & 7 but does not describe how to sequence these OP Codes in the indexer program. I am trying to cut some cams and I need to move the X axis while the indexer rotates.
